

PERSHING STANDARD FILE LAYOUTS

FILE LAYOUT FOR: GLOBAL BOOKKEEPING ACTIVITY

GENERAL INFORMATION

File Frequency: Daily
Record Size: 750 Characters
Form Name: GACT (Brokerage) and GAC1 (Bank Custody)

DESCRIPTION

The Global Bookkeeping Activity files (GACT/GAC1) are created on a nightly basis. The recipient of this file has a choice of receiving trade date or settlement date trade information, non-trade (bookkeeping) information, or any combination of these three types of transactions. The selection of this information is governed by the Transaction Type field (position 070) for trade detail.

These files should just be used for non-trade (bookkeeping) activity. We recommend that GTDE/GSDE or GTOE/GTOL be used for trades. The option of receiving trades on GACT will continue to be available to our customers currently using it.

All record values in Record A (except price) will always appear in U.S. dollars (USD) or U.S. dollar equivalent (USDE). Trades that settle in USD will appear in USD. Trades that settle in a currency other than USD will appear in USDE. These global trades have corresponding values in Record B that show details of the transaction in the settlement currency.

GAC1 is based on the Bank Custody activity attributed to accounts held on the Global Data Repository (GDR) as delivered to Pershing by our service provider(s). GAC1 will run on a different schedule than GACT, and the data from these two files will not be commingled.

The symbol “**B**” is used on our standard files to represent spaces.

New, upcoming fields/records and changes to existing fields are **highlighted in blue**.
