FILE LAYOUT FOR: GLOBAL TRADES / ORDERS

GENERAL INFORMATION

File Frequency: Daily
 Record Size: 1250 characters
 Form Name: GTOE

DESCRIPTION

The Global Trades-Orders file (GTOE) combines GTDE (records A & B) and OELG (record C) and contains all Trade Date trades that were processed (executed and/or cleared) through Pershing’s batch systems as of the previous business day along with associated order data. The file accommodates both domestic and non-domestic transactions.

Records A and B include today’s trade-related data and Record C contains order-related data. They are grouped as one A, B and C record for each transaction.

The design of the layout in Record C has been formatted so that there is only one iteration of positions 667-1250, as the fields for each product type are identical.

The PERSHING INTERNAL TRADE REFERENCE NUMBER is now displayed in Record A, 063-082, as well as in Record C, 1026-1045, for record matching convenience.

The symbol “**B**” is used on our standard files to represent spaces.
