## FILE LAYOUT FOR: RECEIVE AND DELIVER MASTER

### GENERAL INFORMATION

File Frequency: Daily  
 Record Size: 1750 characters  
 Form Name: RDM1 and RDM2

### DESCRIPTION

The Receive and Deliver (Version 2) standard file (RDM1 and RDM2) is created in batch and contains Clearance open items. Open Items consist of institutional and street side trades, ACATs and retail instructions. The transactions could be in US or non-US dollars. Data elements included in this file relate to settlements through DTC, FRB, or International. It also contains DTC ID status, delivery reclaim comments and exposure, to name a few.

RDM1 is sent before PDQ (Pre-Determined Order Quantity), at approximately 2:00 AM and RDM2, the later file, is sent after PDQ, after 3:00 AM.

Record A is for active items, and Record B represents all clean items or cancelled items.

RDM1 uses only record A, while RDM2 uses both A & B records.
