FILE LAYOUT FOR:

GLOBAL CUSTOMER POSITION

GENERAL INFORMATION

File Frequency: Daily
Record Size: 750 characters
Form Name: GCUS (Brokerage) and GCS1 (Bank Custody)

DESCRIPTION

The Global Customer Position files (GCUS and GCS1) are created after the close of business each day. GCUS represents the brokerage business; GCS1 is based on the Bank Custody positions attributed to accounts held on the Global Data Repository (GDR) as delivered to Pershing by our service provider(s).

The files reflect account positions within your office range on an update and refresh basis. Based on Pershing's business model, refresh (full) files are not transmitted daily. Update records are generated only by changes in quantity; market value changes alone do not drive the creation of an update record. All amounts depicted in these files are displayed in USDE (US Dollar Equivalent).

Currencies are displayed as holdings, represented by the User CUSIP. For example, US dollar CUSIP is USD9999997; Euros are EUR999995.

Note: The files contain information on Security/Currency positions only. Money Fund positions are shown on our FUND (for GCUS) and FUNB (for GCS1) files and Annuity holdings are shown on our ASPS file.

GCS1 runs on a different schedule than GCUS, and the data from these two files are not commingled.

The symbol "␣" is used on our standard files to represent spaces.
